GPS Tips: Use the following to help you navigate your geocaching experience...

- Power on your GPS (lower right) & provide wait time for tracking satellite signals
- Use the thumb stick to select “Where To?” to locate the waypoints
- Use the thumb stick to select “Waypoints” and then the waypoint # that you are trying to locate (you will be able to get the direction & distance to the cache on this screen)
- Select the waypoint you are locating to get the coordinates to the cache
- Select “Go” to see the screen with the cache flag & the arrow...remember to use the zoom in/zoom out buttons (top left) to be able to see both on the screen at one time
- Line up your cache flag & arrow and move slowly towards the flag to locate the cache
- Remember that it will only get you within 10 ft. of the cache...you will then have to *use your eyes*!

**IMPORTANT:** Remember to check with your Geocaching Guide to ensure that your team’s cache answer is correct. If your answer is correct your team will be provided the next waypoint on your Geocaching track.

Happy trails! ☺
